StarLeaf 🍃

It's your office, just online

On the days you're working from home, you might be worried about missing out on the office's collaborative ways of working. With StarLeaf, you can keep all your office habits at home. **Here's how.**

1 Working with your team

In the office	At home / online
Your team sits together, and you can chat whenever you need to.	A **group chat** brings everyone together, instantly, wherever they are.
You grab a meeting room for a quick chat with the team.	'**Start new meeting**' creates a virtual meeting room that everyone can enter and leave with one click.
You're presenting to the team, with handouts or docs on a screen.	Choose the '**Active speaker**' meeting layout for presentations. Plus, it's really simple to **share content** with the team, onscreen or **via chat**.

2 Working independently

In the office

You find an empty room and close the door for some focused time.

At home / online

Do not disturb mutes notifications while you're concentrating, and tells everyone you're busy.

3 Working across teams

In the office	At home / online
You drop by Sarah's desk to see if she's got 5 minutes to chat.	Sarah's **online status** is green – you send her a message to check if she's free for a chat
You realize you need James from the Solution's team in this meeting.	You can quickly call to easily **add James** to your video meeting.
You need urgent help. The person you're looking for is in a meeting, but you stick your head round the door.	Presence shows your colleague is in a meeting. You **call them**, and call waiting means they can choose to answer and help you.

StarLeaf is the collaboration tool your business needs. With high quality video and audio connections, enterprise chat, and intuitively simple content sharing, it's quick and easy to bring everyone together whether they're in the office, in their home, or on the go.

Get StarLeaf in your meeting rooms

StarLeaf isn't only a great tool for your devices – it's for your **meeting rooms** too. So you and your colleagues can have the same reliable and intuitive StarLeaf experience no matter where you're working.
