

Shine every time you connect

Wherever and whoever you work with, StarLeaf helps you meet and collaborate productively. **Here's how.**

1 Working with your team

In the office

Your team sits together, and you can chat whenever you need to. 

You grab a meeting room for a quick chat with the team. 

You're presenting to the team, with handouts or docs on a screen. 

At home / online

A **group chat** brings everyone together, instantly, wherever they are.

'**Start new meeting**' creates a virtual meeting room that everyone can enter and leave with one click.

Choose the '**Active speaker**' meeting layout for presentations. Plus, it's really simple to **share content** with the team, onscreen or **via chat**.

2 Working with customers and partners

Face-to-face

You invite people to your office, or travel to theirs, and **meet in person**. 

Virtually

Invite anyone to a **video conference** hosted in a **meeting room** if you're in the office. Or from your **desktop** if you're working remotely.

With StarLeaf MultiJoin, it's easy to join meetings on different services from your StarLeaf meeting room, without the need for complex dial-in codes.

StarLeaf MultiJoin works with Zoom, WebEx, Microsoft Teams, BlueJeans, Microsoft Skype for Business and Pexip.

3 Working spontaneously across teams

In the office

You and your colleagues find a small breakout space that's equipped with a **StarLeaf Huddle**. 

You video-call contacts who are working remotely and add them to your on-site meeting – it takes just one **tap**. 

At home / online

Sarah's **online status** is green – you send her a message to check if she's free for a chat.

You can quickly call to easily **add James** to your video meeting.

StarLeaf is the collaboration tool that's tailor-made for hybrid working.

With high quality video and audio connections, enterprise chat, and intuitively simple content sharing, it's quick and easy to bring everyone together whether they're in the office, in their home, or on the go.
